Accounts / Login:

Users should be able to sign in as guests or through either email, Facebook, or Google+

Maps:

Users should be able to find locations of restrooms on Google maps

User Reviews:

Allow user to rate bathrooms on a scale as well as add optional comments, which can be edited later, to their review. Other users can flag the review as "helpful", "unhelpful", or inappropriate.

Sorting Reviews:

Allow user to filter out or sort bathrooms listed by type of bathroom, cleanliness, hours of operation, contains handicap support, contains a changing room, if fee required, and number of reviews.

Accountability System for Users:

Users who post fake bathrooms can be reported.

Bathrooms:

Each bathroom recorded in out app will contain its location information, user ratings, hours of operation, gender availability, comments from other users, and list of people who have reviewed/verified this bathroom.

List Display:

UI that will display the bathrooms in a list format.
